ACADEMIC DETAILS

B. Tech Lateral Entry (CSE)	2024-2027	MMMUT, Gorakhpur	7.61/10.0
Diploma (Civil Engineering)	2021-2023	Government Polytechnic Gorakhpur	73.2%
Class XII (CBSE)	2020	R.B. Children's Valley Public School	76%
Class X (CBSE)	2018	P.G. Senior Secondary School	72.8%

WORK EXPERIENCE

WSA – Full Stack Web Development in MERN (Internship)

Sep 2025 – Nov 2025

- Worked on SDLC-based project building using MERN stack.
- Hands-on experience with HTML, CSS, JavaScript & React.
- Developed key modules using MongoDB and Express.js for robust data management and efficient API handling.

EXPERIENTIAL LEARNING

Deloitte Australia – Data Analytics Job Simulation (Forage) | Dec 2025.

J.P. Morgan – Software Engineering Job Simulation (Forage) | Dec 2025.

Tata – GenAI Powered Data Analytics Job Simulation (Forage) | Dec 2025

PROJECTS

AI-Based Sign Language Detection System

August 2025 – November 2025

- Project Link: <https://github.com/DivyanshuNathTripathi/Sign-ificant>
- Designed and developed an AI-based sign language detection system using computer vision and machine learning techniques.
- Implemented real-time hand gesture recognition using Python, OpenCV, and deep learning concepts for accurate sign classification.
- Improved accessibility by enabling gesture-to-text conversion, focusing on model accuracy, data preprocessing, and performance optimization.

CALLER-AI

November 2025-Ongoing

- Project Link: <https://www.caller.work> || <https://github.com/DivyanshuNathTripathi/Caller>
- Node.js, REST APIs, Twilio Integration, GCP, Webhooks, Event-driven Architecture
- Caller work- Engineered a backend system for proactive automated calling using Node.js and REST APIs, implementing event-driven workflows, webhook orchestration, structured logging, and cloud deployment on GCP. Achieved reliable execution of 50+ automated calls/month with fault tolerance and sub-second response handling.

Prayukti-Virtual Lab

December 2025- Ongoing

- Project Link: <https://github.com/DivyanshuNathTripathi/Prayukti-vLAB->
- Developed a web-based virtual lab platform to simulate experiments and enable remote practical learning.
- Built responsive user interface using HTML, CSS, and JavaScript, improving usability and accessibility.
- Implemented modular architecture for experiment visualization and user interaction
- Deployed and tested the platform to ensure performance, scalability, and cross-device compatibility.

ACHIEVEMENTS

- Secured Third Prize in an article writing competition organized by BIS (Bureau of Indian Standards).
- Participated in the BIS Youth Connect initiative focused on standardization, quality awareness, and technical writing.
- One Week Training of Digital forensics and Investigation at our College Cyberforensics Lab Under Gorakhpur Police with CYnit Technologies.

SKILLS

Technical: C++, Python, HTML, CSS, JavaScript, MongoDB, Twilio, OpenCV.

Curriculum: Artificial Intelligence, Machine Learning, Computer Vision, Database Management Systems, Software Engineering.

Certificates: Full Stack Internship Certificate || Remote Sensing and Digital Image Analysis (ISRO).

Interests: Full Stack Development, AI/ML, Data Science, Problem Solving, Real-Time Systems, Computer Network.
